

SKITCH

Background Information

Skitch is an app that allows users to annotate photos, camera images, screenshots, web pages, maps or it allows you to draw on a blank page. Think of a coach drawing up plays, a teacher labeling the parts of a cell, an administrator providing visual feedback from a walk-thru observation, and the list goes on.....

Steps to Begin Using Skitch:

Step #1: Download the **Skitch App for your device:** <http://skitch.com> OR iTunes: <http://itunes.apple.com/us/app/skitch-for-ipad/id490505997?mt=8> (QR code above)

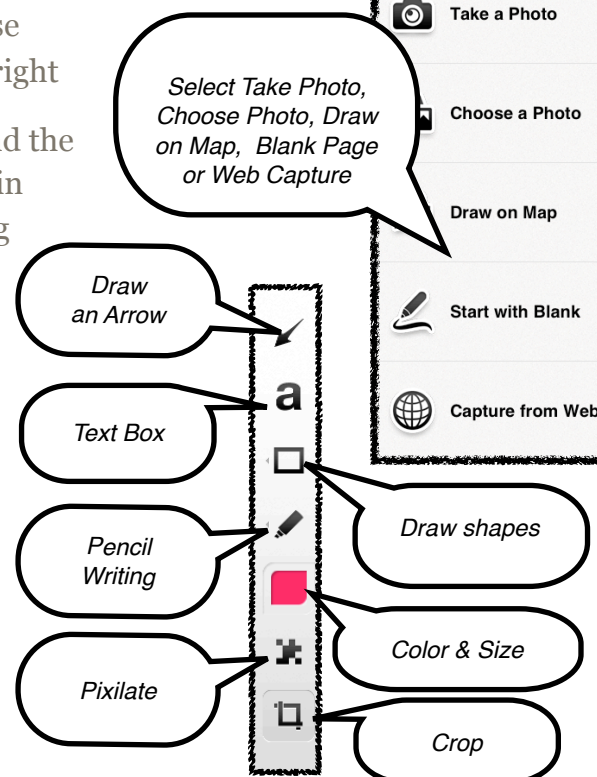

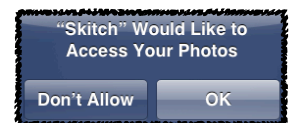

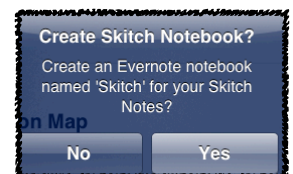

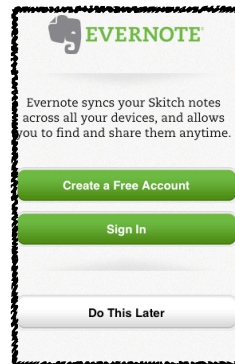

Step #2: The first time you open Skitch you will be prompted to sign in to your Evernote account--sign in using your log-in information, you will also receive a couple of pop-ups asking if you want to create a Skitch Notebook (answer Yes) and asking if the app can access your photos (Yes)--see at right

Step #3: Open the "Skitch" App from your device and select one of the following items to annotate: Take Photo, Choose Photo, Draw on Map, Blank Page or Web Capture--see at right

Step #3: Once the image is open, you can pinch or expand the image and use the tools located along the right side to begin annotating. See the tools at right for assistance annotating your image.

Step #4: Once you have added the annotations, the finished image may be shared in the following ways: to Evernote, Create a Link, Airplay, Email or to the Camera Roll.

Best Practice Use: Students and teachers could use this app for labeling, providing feedback, checking for understanding, drawing on maps, highlighting important information on a web page, etc.

SKITCH ADMINISTRATOR IDEA

Procedure:

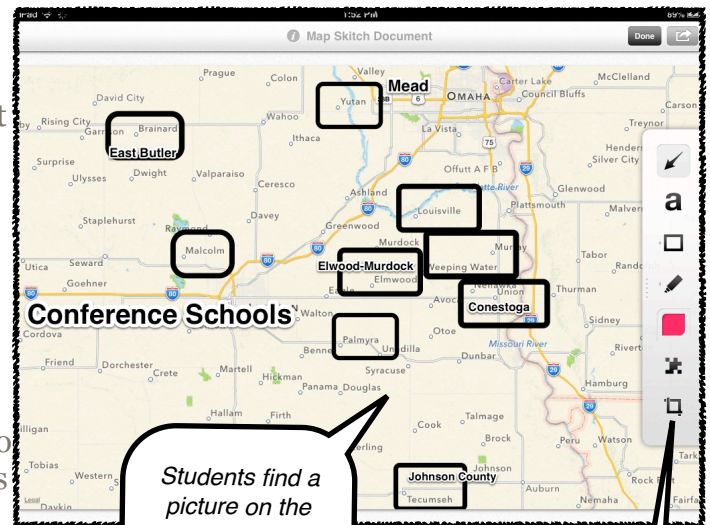

Participants will use their mobile devices to label a map with their conference schools or a bus route, district boundaries, etc.

1. **Participants download the Skitch App** (available for iPad, iPhone, Android, iPod) or use a device with the app downloaded.

2. **Participants will open Skitch and use the map feature** to locate a map of their school district or conference area. (type the school address near the top)

3. **Participants will use the annotation features in Skitch** to create labels and drawing on the map using any of the annotation tools.

4. Once participants are finished annotating the map, they should **save the picture** for review (it will also be added to the Skitch Notebook in Evernote if users are logged into their accounts)

5. (provide email address)

Create labels and drawings on the map using the tools along the right side, "SAVE" is located in the top right corner along with the send to button

Administrator Uses:

1. Take pictures when doing a walk-thru to share visual images and notations from your classroom visit with teachers.

2. Annotate maintenance items in your building and sent them to responsible staff members via e-mail with your annotations on what needs to be addressed.

3. Annotate bus routes for including in newsletters, web sites or other communications.
